

## **Modalities of engagement for relevant stakeholders<sup>1</sup>**

These modalities of engagement for relevant stakeholders in the work of the Intergovernmental Negotiating Body to draft and negotiate a WHO convention, agreement or other international instrument on pandemic prevention, preparedness and response (INB) are established per decision SSA2(5) (2021), which recognizes the importance of broad engagement, in line with the relevant rules and decisions of the World Health Assembly, in the INB's work in order to ensure a successful outcome. They are intended to be a "living document" which may be updated by the INB, as it may decide. These modalities, and any updates to them, will be made publicly available in an accessible web-based format and communicated to Member States.

In that regard, at its third meeting, the INB approved the additional list of entities proposed by Member States for inclusion in Annex E of these modalities on the understanding that these modalities continue to be a living document with further possibilities for updates as deemed appropriate by the INB. The present version of the modalities reflects that outcome: it updates the earlier version as contained in document A/INB/2/4, which was an update of document A/INB/1/7 Rev.1.
